DIGITAL MARKETING INTERNSHIP | PROJECT REPORT

Veda Technology Digital Marketing & Online Growth Campaign

Campaign themes: "Build. Ship. Get Verified." + "Go Digital with Veda"

30-day organic campaign | Rs. 0 paid advertising

Sadhanala Nischay Prasad

Digital Marketing Intern (Level 1), Veda Technology

Project duration: 4 days | Submitted: November 2026

Prepared using only publicly available Veda Technology information (vedatechnology.in).

Executive Summary

Veda Technology serves two audiences at once: learners who want free, practical virtual internships, and businesses that need IT services. This report plans a realistic 30-day organic campaign - no paid advertising - that grows awareness, builds trust and converts both audiences, using only information Veda Technology publishes on its own website.

Most internship certificates prove attendance - Veda Technology's prove output. The campaign builds on the brand's own promise: structured levels, mentor-reviewed tasks and verifiable certificates for learners, and one multi-skill team for businesses.

- Four personas: a 2nd-year B.Tech student, a fresh graduate, a small business owner and a startup founder.
- Content mix of 80% value and 20% promotion across LinkedIn, Instagram, Facebook and Google Business Profile.
- A 30-post calendar, 22 prioritised keywords, 8 SEO content opportunities and 8 website fixes.
- Expected 30-day outcome: ~23,800 impressions/reach, ~609 website visits, ~33 internship applications and the first service inquiries.

Contents

- 1. Brand snapshot & audience analysis
- 2. Target audience personas
- 3. Service-wise audience mapping
- 4. Competitor analysis & SWOT
- 5. Keyword research
- 6. SEO content opportunities
- 7. Website content recommendations
- 8. Social media strategy
- 9. LinkedIn & Instagram content plans
- 10. 30-day content calendar
- 11. Lead-generation campaign
- 12. Call-to-action strategy
- 13. Campaign KPI framework
- 14. Expected performance analysis
- 15. Conclusion

1. Brand Snapshot & Audience Analysis

What Veda Technology publicly states

- Offers free (no application fee), 100% virtual internships that generally run 4-6 weeks.
- Targets B.Tech, BCA, MCA, M.Tech, diploma students and graduates.
- Internship tracks: Web Development, Data Science, Data Analytics, Python, Java, Android, Cloud Computing, Graphic Design and UI/UX.
- Task-based learning in Level 1, 2 and 3 tracks, so beginners and advanced learners both progress.
- Dedicated mentor review on every submitted task; attendance is marked by daily task submission.
- Internship and completion certificate with a unique verification ID; Letter of Recommendation based on performance.
- Offer letters are processed on the 1st and 15th of each month; one internship per month per applicant.
- IT services for businesses: Web Development, App Development, Cloud Computing, Data Science and Digital Marketing.
- Registered under the MSME/Udyam framework. Based in Lakhisarai, Bihar. Contact: support@vedatechnology.in.
- Brand colours: navy (site theme colour #0b1e4d) with orange accents.

Audience segments

Segment	Who	Primary need	Barrier	Channels	Message
Students	2nd-4th year B.Tech / BCA / diploma students, mostly tier-2/3 colleges	First internship, certificate, portfolio projects	Fear of fake or paid internships; exams; no time	Instagram, YouTube, WhatsApp groups, LinkedIn (new)	Free, flexible, level-wise, verifiable
Graduates	2025-26 graduates and job seekers (B.Tech, BCA, MCA, M.Tech)	Real project experience and an LOR to break the 'experience required' loop	Credibility of certificates with recruiters	LinkedIn, Naukri, Telegram job channels	Ship real work; mentor-reviewed ; LOR on performance
Small businesses	Local shops, coaching centres, clinics, traders in Bihar and tier-2 cities	Website and online visibility at a sensible cost	Trust, budget, low technical knowledge	Facebook, WhatsApp, Google Search / Maps	Get online simply, one team for web and marketing
Service customers	Startups and growing SMEs needing apps, cloud or data work	Reliable delivery partner for an MVP, cloud setup or dashboard	Proof of past work; communication	LinkedIn, Google Search, referrals	Web, app, cloud, data and marketing under one roof

Insight: the learner side moves fast (decisions in days, driven by trust and zero cost); the business side moves slowly (weeks to months, driven by proof of work). The campaign therefore uses learner content for reach and builds service pages and trust assets that convert businesses over a longer cycle.

2. Target Audience Personas

Rahul - the 2nd-year B.Tech student

Field	Detail
Segment	Students
Profile	19, B.Tech CSE/AI at a tier-3 college, first smartphone-first learner, limited budget.
Goals	Get a first internship certificate, build 2-3 projects for GitHub, learn a skill beyond the syllabus.
Pain points	Has seen 'pay Rs. 999 for certificate' scams; worried about exams clashing; unsure where to start.
Where they are	Instagram reels, YouTube tutorials, college WhatsApp groups, just started LinkedIn.
Content that works	Beginner roadmaps, '1 project a week' reels, myth-busting about virtual internships.
Primary CTA	Apply free for a Level 1 track

Priya - the fresh graduate

Field	Detail
Segment	Graduates
Profile	22, BCA graduate (2026), applying for fresher roles, active on LinkedIn and Naukri.
Goals	Show recruiters real, reviewed work; earn an LOR; move from Level 1 to Level 3 depth.
Pain points	Every job asks for experience; certificates without proof are ignored by recruiters.
Where they are	LinkedIn feed and carousels, Telegram job channels, email.
Content that works	Resume and portfolio tips, intern project showcases, 'what recruiters check' posts.
Primary CTA	Pick a Level 2/3 track and start this batch

Mr. Sharma - the small business owner

Field	Detail
Segment	Small businesses
Profile	45, runs a coaching centre in Bihar; gets students by word of mouth only.
Goals	A simple website, show up on Google, get enquiries on WhatsApp.
Pain points	Doesn't know who to trust; thinks websites are expensive and hard to maintain.
Where they are	Facebook, WhatsApp, Google Search ('website developer near me').
Content that works	Before/after website explainers, '5 signs your business needs a website', FAQ videos in Hindi/English.
Primary CTA	Request a free quote

Ananya - the startup founder (service customer)

Field	Detail
Segment	Service customers
Profile	28, founder of an early-stage startup; needs an MVP app plus cloud hosting and a data dashboard.
Goals	One dependable team, clear timelines, transparent communication.
Pain points	Freelancers disappear; agencies are slow and costly; hard to judge technical quality.
Where they are	LinkedIn, Google Search, founder communities, referrals.
Content that works	Process breakdowns, tech-stack explainers, delivery checklists (case studies once real projects are approved).
Primary CTA	Request a service quote / discovery call

3. Service-wise Audience Mapping

Offering	Primary	Secondary	Key message	Channel	CTA	KPI
Web Development internship	Students	Graduates	Build and deploy real websites, mentor-reviewed	Instagram, LinkedIn	Apply free	Applications
Data Science / Data Analytics internship	Graduates	Students	Portfolio-ready analysis projects	LinkedIn	Apply free	Applications
Python / Java internship	Students	Graduates	Strong programming basics through daily tasks	Instagram, YouTube Shorts	Apply free	Applications
Android internship	Students	Graduates	Ship an app you can show in interviews	Instagram, LinkedIn	Apply free	Applications
Cloud Computing internship	Graduates	Students	Hands-on cloud skills recruiters ask for	LinkedIn	Apply free	Applications
Graphic Design & UI/UX internship	Students	Graduates	Design portfolio built task by task	Instagram	Apply free	Applications
Web Development service	Small businesses	Service customers	Get your business online simply	Facebook, Google Search	Request a free quote	Inquiries
App Development service	Service customers	Small businesses	From idea to working app	LinkedIn, Google Search	Request a quote	Inquiries
Cloud Computing service	Service customers	-	Reliable hosting and cloud setup	LinkedIn	Request a quote	Inquiries
Data Science service	Service customers	Small businesses	Turn your data into decisions	LinkedIn	Request a quote	Inquiries
Digital Marketing service	Small businesses	Service customers	Be found where your customers search	Facebook, Instagram	Request a free quote	Inquiries

4. Competitor Analysis & SWOT

A qualitative comparison by competitor type, based on publicly visible positioning; no figures are claimed for any competitor.

Type	Examples	Strengths	Weaknesses	Veda's angle
Internship marketplaces	e.g. Internshala	Huge listing volume, strong brand trust, SEO dominance	Generic listings; quality varies by employer; little structured learning	Structured Level 1-3 tracks with mentor review on every task
Other free virtual-internship providers	Many task-based programs popular on student LinkedIn	Viral reach through intern LinkedIn posts and tagging	Often seen as 'certificate mills'; weak verification	Lead with proof: verification ID, mentor review, output-based certificates
Paid ed-tech courses and training institutes	Bootcamps, coaching institutes	Big brands, placement messaging, structured syllabus	High fees; long duration	Free to apply and 4-6 weeks - lower risk to try
Local web agencies and freelancers (services)	Local developers, freelance marketplaces	Low price, local relationships	Inconsistent quality; single skill; poor follow-up	One team covering web, app, cloud, data and marketing

SWOT

Strengths - Free, 100% virtual, low-risk offer - Wide set of tech tracks - Level-wise structure + mentor review - Verifiable certificates; MSME/Udyam registered	**Weaknesses** - Low brand awareness vs. marketplaces - Few public case studies for services - Homepage stats show '0+' to crawlers/no-JS visitors - Service links point to one #services section
Opportunities - Intern-generated content (every intern posts on LinkedIn) - Long-tail SEO for each track - Local SEO for Bihar/tier-2 businesses - Hindi + English content for SMBs	**Threats** - Distrust of free internships due to scams - Large competitors outranking on broad keywords - Algorithm changes reducing organic reach

5. Keyword Research

Keywords are grouped by cluster and mapped to one target page each. Competition is a relative estimate; volumes should be validated in Google Keyword Planner and seasonality checked in Google Trends (India, last 12 months) before publishing.

Keyword	Cluster	Intent	Target page	Comp.	Priority
free virtual internship for students	Core	Transactional	Home / Apply	High	P1
online internship with certificate	Core	Transactional	Apply	High	P1
internship for 2nd year btech students	Core	Informational	Blog + Apply	Medium	P1
internship for bca students	Core	Transactional	Apply	Medium	P1
how to verify internship certificate	Trust	Informational	Certificate verification page	Low	P1
is virtual internship worth it	Trust	Informational	Blog	Low	P2
web development internship online	Tracks	Transactional	Web Dev track page	High	P1
data science internship for beginners	Tracks	Transactional	Data Science track page	Medium	P1
data analytics virtual internship	Tracks	Transactional	Data Analytics track page	Medium	P2
python internship online free	Tracks	Transactional	Python track page	Medium	P1
java internship for btech students	Tracks	Transactional	Java track page	Medium	P2
android development internship	Tracks	Transactional	Android track page	Medium	P2
cloud computing internship for students	Tracks	Transactional	Cloud track page	Medium	P2
ui ux design internship online	Tracks	Transactional	UI/UX track page	Medium	P2
graphic design internship work from home	Tracks	Transactional	Graphic Design track page	Medium	P3
portfolio project ideas for students	Learning	Informational	Blog	Medium	P2
website development company in bihar	Services-local	Commercial	Web Dev service page	Low	P1
website developer in lakhisarai	Services-local	Commercial	Web Dev service page	Low	P1
app development services for small business	Services	Commercial	App Dev service page	High	P2
cloud setup services for small business india	Services	Commercial	Cloud service page	Medium	P3
digital marketing services for small business	Services	Commercial	Digital Marketing service page	High	P2
data dashboard development services	Services	Commercial	Data Science service page	Low	P3

6. SEO Content Opportunities

Opportunity	What and why
One landing page per internship track	Title, syllabus by level, sample tasks, FAQ (FAQPage schema), Apply CTA. Targets every 'Tracks' keyword.
Certificate verification guide	'How to verify a Veda Technology certificate' - answers a trust query and supports recruiters.
Blog: Internships for 2nd-year B.Tech students	Practical guide; links to Level 1 tracks.
Blog: Is a virtual internship worth it?	Honest pros/cons and what recruiters check; reduces scam fear.
Blog: Portfolio project ideas by domain	Evergreen, shareable; internal links to each track page.
Intern project showcase page	Curated intern work (with consent) - fresh content + social proof.
Separate service pages	Web, App, Cloud, Data Science, Digital Marketing - each with process, FAQ and quote form.
Local SEO	Google Business Profile + 'website development in Bihar / Lakhisarai' page with NAP details.

Search Console & Analytics concepts

- Search Console: track impressions, clicks, CTR and average position; push page-2 queries up with better content.
- Search Console: submit the sitemap and check the Pages report so every track and service page is indexed.
- Analytics (GA4): acquisition by source/medium via UTM, key events (apply_submit, quote_submit), funnel from landing page to application.

7. Website Content Recommendations

Recommendation	Details
Fix the homepage counters	The public page text shows '0+ Interns Trained', '0+ Hiring Partners' (JavaScript counters). Render real, verified numbers in HTML - or remove them - so crawlers and slow connections don't see zeros.
Give each service its own URL	The chat widget links every service to /#services. Dedicated pages rank better and can be tracked separately.
Add a 'How it works' timeline	Apply -> Offer letter (1st/15th) -> Dashboard -> Daily tasks -> Mentor review -> Certificate + LOR.
Show the trust signals together	MSME/Udyam registration, certificate verification ID, free application - one trust strip above the fold.
Make testimonials verifiable	Name, track, and LinkedIn link (with consent) instead of anonymous quotes.
Add a short service-quote form	Name, business, service needed, budget range, WhatsApp number - with clear response-time expectation.
Technical SEO basics	Search Console verification, XML sitemap, Organization + FAQPage + Course schema, image alt text, Core Web Vitals check.
Analytics events	GA4 events for apply_click, apply_submit, quote_submit, whatsapp_click; UTM links on every social post.

8. Social Media Strategy

Goals

- Grow awareness among students and graduates and turn it into internship applications.
- Build trust by showing real output, mentor review and verifiable certificates.
- Generate service inquiries from small businesses and startups without paid ads.

Content pillars - 80% value, 20% promotion

Pillar	Share	What	For
Learn	40%	Free value: roadmaps, tips, tools, mini-tutorials	Students, Graduates
Proof	25%	Intern projects, mentor feedback snippets, certificate verification	Students, Graduates
Community	15%	Behind the scenes, polls, Q&A, intern spotlights	All
Programs	10%	Tracks, levels, batch dates (1st & 15th)	Students, Graduates
Services	10%	Web/app/cloud/data/marketing for businesses	Small businesses, Service customers

Platform plan

Platform	Role	Frequency	Formats	Goal
LinkedIn	Primary - graduates, recruiters, startup founders	4 posts/week	Carousels, text + image, polls, short video	Credibility and B2B leads
Instagram	Primary - students	4 posts/week + daily stories	Reels (30-45 s), carousels, stories, highlights	Reach and applications
Facebook	Secondary - local small businesses	3 posts/week	Image posts, short videos, local groups	Service inquiries
Google Business Profile	Local search	1 update/week	Updates, photos, Q&A	Local discovery

Branding: navy (#0b1e4d) backgrounds with orange highlights and white text, one Canva template family per format (reel cover, carousel, quote card).

9. LinkedIn & Instagram Content Plans

LinkedIn

Week	Posts
Week 1 - Why Veda	Launch post on the 'output, not attendance' promise; carousel: How Level 1-2-3 works; poll on biggest internship worry; founder/mentor intro post.
Week 2 - Learn	Carousel: 6-week Web Dev roadmap; text post: what recruiters check in an internship; doc post: portfolio checklist (lead magnet); intern project spotlight.
Week 3 - Proof	How to verify a certificate (step carousel); mentor feedback example (anonymised); 'day in the life' of a virtual intern; services post: one team for web, app, cloud.
Week 4 - Convert	Batch reminder (offer letters on 1st/15th); FAQ carousel; business post: 5 signs your business needs a website; recap + thank-you post with apply link.

- Company page posts + reshares by mentors/team (employee advocacy)
- Encourage interns to tag Veda in their project posts and reshare the best ones
- Hook in the first 2 lines, one CTA per post, link in first comment
- Post Tue-Thu, 9-11 am IST; reply to every comment within 24 h

Instagram

Week	Posts
Week 1 - Awareness	Reel: 'Free internship? Here's how to spot a real one'; carousel: tracks at a glance; story poll: which track?
Week 2 - Learn	Reel: build a landing page in 60 s; carousel: Python basics cheat sheet; story Q&A with a mentor.
Week 3 - Proof	Reel: intern project showcase; carousel: certificate verification steps; stories: daily task streaks.
Week 4 - Convert	Reel: apply in 2 minutes walkthrough; carousel: FAQ; story countdown to the next batch date.

- Highlights: Apply, Tracks, Certificates, Services, FAQ
- Bio link -> apply page with UTM (utm_source=instagram)
- Navy + orange Canva templates; captions under 125 words
- 3-5 targeted hashtags e.g. #virtualinternship #btechstudents #webdevelopment

10. 30-Day Content Calendar

Day	Platform	Format	Pillar	Topic	Hook	CTA
1	LinkedIn	Text + image	Programs	Campaign launch: Build. Ship. Get Verified.	Most certificates prove attendance. Ours prove output.	Apply free
2	Instagram	Reel	Learn	How to spot a genuine free internship	3 red flags every student should know	Save + follow
3	Facebook	Image post	Services	5 signs your business needs a website	Customers search before they visit	Request a free quote
4	LinkedIn	Carousel	Programs	How Level 1, 2 and 3 tracks work	Beginner or advanced - pick your depth	Choose your track
5	Instagram	Carousel	Programs	All internship tracks at a glance	9 tracks, one free application	Link in bio
6	Instagram	Story poll	Community	Which track would you pick?	Web, Data, Python or Design?	Vote
7	LinkedIn	Poll	Community	Biggest worry about virtual internships	Be honest - what stops you?	Vote + comment
8	Instagram	Reel	Learn	Build a landing page in 60 seconds	HTML + CSS, no setup	Save for later
9	LinkedIn	Carousel	Learn	6-week Web Development roadmap	Week by week, from zero to deployed	Download checklist
10	Facebook	Short video	Services	What a business website includes	Pages, WhatsApp button, Google listing	Request a free quote
11	LinkedIn	Text post	Learn	What recruiters check in an internship	A certificate alone isn't enough	Comment 'checklist'
12	Instagram	Carousel	Learn	Python basics cheat sheet	10 lines every beginner should know	Save + share
13	Instagram	Story Q&A	Community	Ask a mentor anything	Your internship questions, answered	Ask a question
14	LinkedIn	Document post	Learn	Internship-ready portfolio checklist (lead magnet)	Free 1-page checklist	Download via form
15	Instagram	Reel	Programs	New batch: offer letters on the 1st and 15th	Apply this week for the next batch	Apply free
16	LinkedIn	Image post	Proof	Intern project spotlight #1 (with consent)	Built in week 2 of the Web Dev track	See more projects
17	Facebook	Image post	Services	One team for web, app, cloud and data	Stop juggling five freelancers	Message us
18	LinkedIn	Carousel	Proof	How to verify a Veda Technology certificate	Every certificate has a unique ID	Verify now
19	Instagram	Reel	Proof	Intern project showcase	From task brief to finished project	Apply free
20	Instagram	Carousel	Proof	Certificate verification in 3 steps	Recruiters can check it in seconds	Save
21	LinkedIn	Short video	Community	A day in the life of a virtual intern	Daily task, mentor review, repeat	Follow the page
22	LinkedIn	Text + image	Services	From idea to working app: our process	Discovery -> design -> build -> launch	Request a quote
23	Instagram	Story series	Community	Daily task streaks from interns	Consistency beats talent	Share your streak
24	Facebook	Image post	Services	Get found on Google Maps	Local customers search 'near me'	Request a free quote

Day	Platform	Format	Pillar	Topic	Hook	CTA
25	LinkedIn	Carousel	Learn	Portfolio project ideas by domain	12 ideas across 6 tracks	Save + share
26	Instagram	Reel	Programs	Apply in 2 minutes - walkthrough	No fee, fully online	Apply free
27	LinkedIn	Carousel	Programs	Internship FAQ	Free? Virtual? Certificate? Answered.	Apply free
28	Instagram	Carousel	Programs	FAQ for students	Your top 6 questions	Link in bio
29	Instagram	Story countdown	Programs	Countdown to the next batch	Offer letters go out soon	Apply free
30	LinkedIn	Text + image	Community	Campaign recap + thank you	30 days, real projects, real learners	Apply / Request a quote

Pillar mix: Programs 8, Learn 7, Services 5, Community 6, Proof 4. Promotional posts (Programs + Services) stay a minority; the rest teach, prove or engage.

11. Lead-Generation Campaign

Learners: "Build. Ship. Get Verified." - learn, ship real projects, earn a verifiable certificate. Businesses: "Go Digital with Veda" - one team for web, app, cloud, data and marketing. Ad budget: Rs. 0.

Funnel

Stage	Tactics	Measured by
Awareness	Reels, carousels, SEO blog posts, Google Business Profile	Reach, impressions, new followers
Interest	Roadmaps, cheat sheets, mentor Q&A	Engagement rate, saves, profile visits
Consideration	Track pages, FAQ, certificate verification, project showcases	Website visits, time on page
Conversion	Apply form (learners); quote form / WhatsApp (businesses)	Applications, inquiries, conversion rate
Advocacy	Interns tag Veda in project posts; reshares; testimonials	Mentions, user-generated posts

Lead magnets

Lead magnet	Audience	Where	Status
Internship-ready portfolio checklist (PDF)	Students & graduates	LinkedIn document post / Google Form	Ready to use
6-week Web Development roadmap (PDF)	Students	Instagram + LinkedIn	Ready to use
Free website quote with a short consultation	Small businesses	Facebook, Google Business Profile	Confirm with Veda team before launch

Lead capture & nurture

Capture through the website apply form, a Google Form for lead magnets, and WhatsApp/email for businesses.

- Day 0: thank-you message + the promised PDF + link to track pages
- Day 2: 'Which track suits you?' guide + certificate verification explainer
- Day 5: batch reminder (offer letters on the 1st and 15th) + apply link
- Businesses: reply within 24 h on WhatsApp/email, share process and next steps

12. Call-to-Action Strategy

Stage	Audience	CTA	Placement
Awareness	Students	Save this for later / Follow for daily tips	End of reels and carousels
Interest	Students & graduates	Download the free checklist	Document posts, story link sticker
Consideration	Graduates	See how certificate verification works	Certificate carousel, website
Conversion	Students & graduates	Apply free - next batch on the 1st/15th	Bio link, post first comment, website header
Conversion	Small businesses	Request a free quote	Facebook posts, service pages, GBP
Conversion	Service customers	Book a discovery call / request a quote	LinkedIn services posts, service pages
Advocacy	Interns	Tag @Veda Technology in your project post	Dashboard reminder, completion message

- One primary CTA per post
- Start with a verb (Apply, Download, Request, Save)
- Give value first; promotion in at most 2 of every 10 posts
- Every link carries a UTM tag so conversions are attributed to the right post

UTM example: vedatechnology.in/apply.html?utm_source=linkedin&utm_medium=organic&utm_campaign=build_ship_verified&utm_content=day09_roadmap

13. Campaign KPI Framework

KPI	Definition	Source	30-day target	Review
Website visits	Sessions to vedatechnology.in from all organic sources	Google Analytics (GA4)	See expected scenario	Weekly
Apply-page visits	Sessions that reach the apply page	GA4	See expected scenario	Weekly
Internship applications	Completed apply-form submissions	GA4 event / form data	See expected scenario	Weekly
Service inquiries	Quote-form submissions + WhatsApp/email inquiries	GA4 event + inbox log	See expected scenario	Weekly
Engagement rate	(Reactions + comments + shares + saves) / impressions	LinkedIn & Instagram insights	4-5%	Per post
Follower growth	Net new followers on LinkedIn + Instagram	Platform insights	+10% in 30 days	Weekly
Link click-through rate	Link clicks / impressions	Platform insights + UTM	1-2%	Per post
Visit-to-application rate	Applications / apply-page visits	GA4	8-10%	Weekly
Organic search clicks	Clicks from Google Search	Google Search Console	See expected scenario	Weekly
Lead-magnet downloads	Checklist / roadmap form submissions	Google Form	40-60	Weekly

14. Expected Performance Analysis

Planning estimates for a new organic campaign. All results are live formulas in the attached workbook (Expected Performance sheet).

Assumptions

Assumption	Conservative	Expected	Optimistic
LinkedIn posts (30 days)	14	14	14
LinkedIn avg impressions per post	500	900	1,400
LinkedIn engagement rate	3.0%	4.5%	6.0%
LinkedIn link CTR	1.0%	1.5%	2.5%
Instagram posts + reels (30 days)	12	12	12
Instagram avg reach per post	400	800	1,500
Instagram engagement rate	3.5%	5.0%	7.0%
Instagram link-click rate	0.6%	1.0%	1.5%
Facebook posts (30 days)	4	4	4
Facebook avg reach per post	200	400	700
Facebook link CTR	1.0%	1.5%	2.0%
Organic search + direct visits	150	300	500
Share of visits reaching apply page	55.0%	60.0%	65.0%
Apply-page to application rate	6.0%	9.0%	12.0%
Share of visits reaching service pages	10.0%	15.0%	20.0%
Service-page to inquiry rate	1.0%	2.0%	3.0%

Projected 30-day results

Metric	Conservative	Expected	Optimistic
Total impressions / reach	12,600	23,800	40,400
Total engagements	378	1,047	2,436
Website visits	257	609	1,316
Apply-page visits	141	365	855
Internship applications	8	33	103
Service inquiries	0	2	8

- Biggest levers: average LinkedIn impressions per post (helped by intern reshares) and apply-page conversion (helped by the website trust fixes).
- Service inquiries stay low in 30 days by design - B2B cycles are longer; the campaign builds the pages and proof that convert later.
- Review weekly: give formats that beat the average by 2x more slots in weeks 3-4; replace assumptions with actuals after week 1.

15. Conclusion

For a free internship brand, trust is the main conversion lever. By leading with proof - mentor-reviewed work, verifiable certificates and real intern projects - and pointing every post, keyword and lead magnet at one clear page and CTA, Veda Technology can grow both its learner community and its service pipeline without spending on ads. The plan is ready to execute and measurable from day one.

Guidelines followed

- Only publicly available Veda Technology information was used.
- No services, certifications, partnerships or numbers were claimed that Veda Technology does not publicly state.
- New offers are marked as needing team approval.
- No paid advertising spend.
